"Quality, Fit, And Absorbs Bright Light.

These gloves fit beautifully, are of high quality and the color works well with preventing glare from the bright light that I use to do my work. I highly recommend these gloves." – Beverly

Advanced nitrile formulation creates a softer, more elastic glove while maintaining strength and durability. Distinct black color helps: make it easy to see potentially hazardous powders/substances, masks stains, reduces glare in high light situations. Low foam formulation provides a secure grip even when wet.
